Profile

Mature Unity Dev, that has been through **a lot**. I created and released projects from scratch and maintained a long-living dinosaurs. Worked on all kinds of unity projects from business apps to midcore games. Not only I do posess strong Unity3D knowledge, but also capable of Node.js scripting and ObjC plugins development. Most of hyped Unity techs like Zenject, UniRX, Odin Inspector and Addressables are in my sleeve. Always into new technologies and various qualification courses on Udemy. Currently an active enthusiast in Unity's Machine Learning capabilities

Employment History

Senior Unity Developer, Warmfare, Poltava

FEBRUARY 2024 — OCTOBER 2024

- Integrated Unity app into a Flutter app. Yeah, right. Flutter crossplatform frontend with versatile frontend features that Flutter delivers, and with Unity game inside
  - That included solving numerous issues per platform:memory issues on WebGL, compatibility on mobile, etc
  - Writing native/subnative bridges for communication, using JS/ObjC/Dart
- Lead creative team to create card game, in traditions of Marvel Snap/Heart Stone but with our own unique taste. Techs involved include heavy use of Addressables, Zenject, Spine
- Prototyped tools and systems to speed up development, using NodeJS, Telegram API

Senior Unity Developer, Self Employed, Poltava

JUNE 2023 — FEBRUARY 2024

- Architected and implemented pet project for aduuults, yeeeah, heavily using Stable Diffusion, Google Collab, Unity3D(Zenject, TDD, Addressables, Odin Inspector). Project is still in development
- Developed and Soft-launched a clients child-dream game. App is in review, but it is basically a clone of My Mini Mart

Senior Unity Developer, Playgendary, Poltava

FEBRUARY 2023 — JUNE 2023

- Created numerous new mobs, windows and features for Crash Heads
- Created infrastructure and implemented tournaments and season pass for Kick the Buddy
- Cleaned numerous bugs and performed tasks and implemented redisign for 300 Bowmans

Senior Unity Developer, Self Employed, Poltava

FEBRUARY 2022 — FEBRUARY 2023

Worked as a freelancer for various clients

- Created AI and worked on GD tools for NFT involved Idle game about Lobsters. IN SPACE! Heavy focus on Zenject, UniRX, Scriptable Objects
- Worked on infrastructure and architecture for Monopoly game with NFT twists. Primarly used Zenject, UniRX, Scriptable Objects, Addressables, Unity UI
- Created GD tools and client widged for graffity drawing in GTA San Andreas-ish game with graffity drawing focus. Developed core architecture solutions

Hobbies

I am highly enthusiastic in esoteric and occult. Love ethnic musical instruments. Also have a 1-dan Kendo degree and love Wing Chun

- Architected, developed and released pet project for Jawharp players, Jawharpia. Used Zenject, UniRX, TDD, Icecast2 radiostation
- Created numerous telegram bots using Node.JS, including this book searcher one, loved by many

Senior Unity Developer, Crysberry Studio, Kharkiv

NOVEMBER 2018 — FEBRUARY 2022

- Interviewed numerous developers, estimated and performed RND on a number of presale projects
- Architected and created backend infrastructure for Kharkiv Literature Museum app, which was nominated on Webby. Project involved creating an online radiostation, which was hell of a fun :D
- Created and released 3D house builder app, that boosted client's business.
- Developed countless features in gambling app for client in America. Work involved almost full refactoring of legacy features, redising, lots of UI work and lots of game designer tools. Created, as I think, perfect infrastructure for tutorials, that does not involve app's infrastructure changes.
- Created Unity3D bridge to use native iOS Verizon SDK plugin
- Created Unity3D bridge to use native iOS FBAN SDK plugin
- Created and released number of smaller AR applications for various small businesses

Unity Developer, iLogos Europe, Kharkiv

MAY 2018 — NOVEMBER 2018

- Worked as an outstaff Engine team member at Nekki on Shadowfight 3
- Reached a goal of 30fps even on oldest of devices.

Unity Developer, Mage Studio, Kharkiv

MAY 2017 — FEBRUARY 2018

- Created minigames for toddler apps, using Unity3D, C#, PlayMaker
- Developed native plugins and tools for company's infrastructure using Scriptable objects, ObjC and, sometimes, Javascript and Java
- Hugely involved in RND and optimising complany's development processes

iOS/Unity developer, Tundra Mobile, Kharkiv

MAY 2015 — APRIL 2017

- Helped client to change his business model from reskins to huge visual novel client with backend. Required complete re-architecting of existing ObjC app and creating Node.js/MongoDB backend. Not mentioning work with all possible ad SDK's
- Created and released several small Unity3D games
- Was a part of huge teem working on ObjC business app for clients loundry franchise

.Net Developer, Digital Cloud Technologies, Kharkiv

FEBRUARY 2014 — DECEMBER 2014

- Created and released a Youtube client with ability to download videos and whole playlists on WPF for Windows 8 and Windows Phone(Universal App)

Education

Specialist at Computer Science, National Aerospace University "Kharkiv Aviation institute"", Kharkiv

SEPTEMBER 2013 — DECEMBER 2017
